PROFILE

Full-stack software engineer with a frontend focus and production experience building and modernising web applications with React and TypeScript. I enjoy solving complex technical problems, improving existing systems measurably, and turning complicated workflows into intuitive user interfaces. My background combines software engineering with digital media, UX-oriented coursework, and several years of customer-facing experience in retail banking. Open to relocating internationally and available from May 2027 for an internship, or a full-time role that covers my master's internship and thesis.

EXPERIENCE

Software Engineer — **Jan 2025 – Present**

EELOY AG, Fulda

- Drive the migration of a production web application from ExtJS to React/TypeScript.
- Rebuilt 30 of 40+ list and CRUD pages in React with Redux Toolkit so far.
- Replaced Webpack with Vite, reducing dev server startup from ~84 s to ~1 s and removing 349 dependencies.
- Build user interfaces in close collaboration with product designers, from mockups through to release.
- Introduced frontend testing with Vitest, raising code coverage from 0% to ~70%.
- Design and optimise PHP/Symfony backend routes for the new React frontend.
- Mentor apprentices and interns through pair programming, code reviews and onboarding.

Frontend Engineer (Working Student & Intern) — **Apr 2022 – Dec 2024**

EELOY AG, Fulda

- Built a campaign analytics dashboard end to end, from the PHP/Symfony backend to the React frontend, used by 290+ car dealerships to track email and web engagement by customer segment.
- Learned industry best practices such as OOP, code reviews and testing in a professional development team.

Research Student (Bachelor thesis) — **Jul 2024 – Oct 2024**

EELOY AG, Fulda

- Assessed the feasibility of predicting Customer Lifetime Value from company data, comparing a Deep Neural Network and a Random Forest model (Python, TensorFlow, scikit-learn).
- Identified data quality gaps limiting accuracy, which led to new internal data quality processes.

Customer Advisor, Retail Banking — **Jan 2015 – Mar 2018**

VR Bank Bad Orb-Gelnhausen eG, Bad Orb

- Advised retail customers on accounts, payments and banking products in 5+ meetings per week, achieving individual sales targets and gaining first-hand insight into what customers need from their bank.

EDUCATION

Global Software Development (M.Sc.) — **Oct 2025 – expected 2028**

Hochschule Fulda – University of Applied Sciences, Fulda

- Current grade: 1.0 (German scale, 1.0 = best)
- Relevant coursework: Microfrontends & Microservices in Action, Building Web and Mobile Apps, Distributed Applications, Test Oriented Development, Cloud Computing, Big Data Technologies and more

Digital Media (B.Sc.) **Oct 2020 – Nov 2024**
Hochschule Fulda – University of Applied Sciences, Fulda

- Final grade: 1.1 (German scale, 1.0 = best)
- Awarded the Ewald Vollmer Prize (2025) as one of the department's top graduates.
- Relevant coursework: Software Engineering, Algorithms & Data Structures, Programming, Databases, Human-Computer Interaction, Usability Evaluation, Web Design, Web Programming and more

---

PORTFOLIO

Crave – Micro-Frontend Food Ordering Platform
github.com/dmnk-ws/crave

- 4-person team project: React, Vue and Svelte micro-frontends composed at runtime as native Web Components, backed by polyglot microservices.
- Built the framework-free app shell (routing, lazy loading, error handling) and a shared npm package for cross-app communication via the BroadcastChannel API.
- Built the React/TypeScript catalog frontend test-first with Vitest (search, filtering, pagination), plus the Symfony restaurant API.

Multi-Model Chat
github.com/dmnk-ws/ai-chatbot

- Next.js/TypeScript app for chatting with and comparing Mistral, OpenAI, xAI Grok and Anthropic models.
- JWT authentication, persistent chat history in MongoDB, Markdown rendering and a responsive Tailwind UI.
- Components and hooks covered with Vitest, React Testing Library and MSW.

Moviebase – Movie & TV Discovery App
github.com/dmnk-ws/moviebase

- React/TypeScript app for browsing trending movies and shows via the TMDB API, with search, genres, detail pages and trailers.
- Migrated from Create React App to Vite and TypeScript, with Redux Toolkit for global state and a typed API client.

INTERNATIONAL EXPERIENCE

Work and Travel **Aug 2018 – Sep 2020**
New Zealand

- Worked varied jobs (supermarket, seasonal work, trades) in multicultural teams, adapting quickly to new environments, and became fluent in English.

Exchange Semester (Erasmus Programme) **Aug 2022 – Mar 2023**
Linnaeus University (Linnéuniversitetet), Sweden

- Coursework in an international environment, including Operating Systems and Computer Security.

SKILLS

Frontend: TypeScript, JavaScript, React, Redux Toolkit, Next.js, HTML5, CSS, Tailwind CSS, Webpack, Vite, Web Components

Testing & Quality: Vitest, Jest, Cypress, Playwright, React Testing Library, MSW, ESLint, Prettier

Backend: PHP, Symfony, Node.js, Express, Java, Spring Boot

Database: MySQL, PostgreSQL, MongoDB

Data & ML: Python, NumPy, TensorFlow, scikit-learn, pandas

Other: Git, Docker, Figma, Sentry

Languages: German (native), English (C1), Spanish (A2–B1)
